

14HO5411 PALERMO: Goldwyn's Best for TPI

With the August genetic evaluations, 14HO5411 Glen-Ann PALERMO-ET enters the official TPI list as Goldwyn's top son at +1998. He is also the top Goldwyn son in the U.S. for type at +3.25. PALERMO added 43 daughters to his production proof and increased 86 pounds for Milk. He also jumped 0.4 points for DPR and has an initial SCR of +1.0.

TPI	Milk	Fat %	Protein %	PTAT	UDC	PL	SCS	DPR	SCR
+1998	+507	+.04%	+.02%	+3.25	+2.72	+2.5	+2.72	+0.5	+1.0

PALERMO is a very consistent type transmitter that adds much more strength than a typical Goldwyn son. His daughters are tall and wide-chested with deep, open rib and wide, level rumps. PALERMO sires shallow udders with tremendous rear udders and well-defined clefts. He adds set to the hock and increases substance of bone.

PALERMO is backed by a solid cow family with impressive milk production. His dam is Glenn-Ann Miss Pepperdine (VG-89 EX-MS DOM), a Rudolph daughter with 72,121 kg milk lifetime at 4.5% fat and 3.4% true protein. The granddam, Wilcoxview Perfec Formation (VG-87 GMD DOM), made 52,244 kg lifetime with 3.9% fat and 3.1% true protein. PALERMO's third dam, Wilcoxview Blackstar Pepper (VG-85 GMD DOM), produced 67,585 kg lifetime at 3.9% fat and 3.0% true protein.

With breed-leading type and udders, super components, solid fitness traits, and a strong cow family, PALERMO is one of Goldwyn's top sons for overall herd improvement.
